About HUITONG

HuiTong Paper Machinery Co.,Ltd is a professional paper machinery manufactor in Taiwan.

products are included high-speed laminating machine(single sided/both sided), precision high-speed sheet cutter machine, high-speed slitter rewinder machine.

Plus, we offer whole factory equipments export and technical consulting of various paper containers.

As our initial commitment, HuiTong always follows the principle of quality-first, customer first and customer-oriented.

We have a complete before and after sale service system to make sure all problems can be solved timely and properly.

In addition, there are services like installation,trial run and technical training which can be provided to all distinguished customers.

PAPER MACHINERY

Paper Processing Machines

Huitong, the Paper products manufacturing machines supplier is expert in paper production machines, paper producing machine for years in Taiwan. Our paper producing machines include laminating machine, biaxial winding high speed, high speed cutting machine. Huitong always follows the principle of quality-first, customer first and customer-oriented. We have a complete before and after sale service system to make sure all kinds of situation can be solved timely and properly.

Biaxial Winding High Speed slitting Rewinding Machine

Product Description

CT Series the company produced high speed drum cutting machine. This machine is a high-performance cutting equipment, through computer control and mechanical technology perfect combination, the machine makes the operation more simple, maintenance easier, the whole machine adopt PLC control, plus flying shear system, ensure that the mechanical operation at high speed, maintaining cutting accuracy and mechanical stability.

Product Specifications

Model	CT-1400	CT-1700
Max.width of cutting	1400mm	1700mm
Cut-off accuracy	±0.5mm	±0.5mm
Max.design speed	300m/min(450sheets/min)	300m/min(450sheets/min)
Cut-off length range	460~1370mm	460~1370mm
Cutter load	550g/m ²	550g/m ²
Pile height	1350mm	1350mm
Thickness scope	60~550gsm	60~550gsm
Overall dimension(LxWxH)	10500x3800x2150	10500x4100x2150

Biaxial Winding High Speed slitting Rewinding Machine

Product Description

Our company products "biaxial winding high speed slitting rewinding machine", it is one kind of high performance "cutting and rewinding equipment" with completely PLC control (Programmable Logic Controller).

User-friendly interface and it is completed cutting and rewinding by "Mill Roll stand (the multi-point brake system), hydraulic correct side of the system, the tension control system, the middle drive system, slitting device, servo drive winding system, to complete slitting, rewinding work.

This equipment is suitable for large size of trimming, cutting and rewinding such as coated paper, kraft paper, glass paper, coated white board and related PVC material.

Product Specifications

- Line Speed: 0~350 m/min
- Basis Weight for paper: 35g/m²~480g/m²
- Width of Slitting: 30~1650mm
- Precision: ±0.5mm
- Max. Diameter of unwinding: Ø1650mm
- Max. Diameter of slitter rewinding: Ø1650mm
- Max. Diameter of rewinding: Ø1650mm
- Max. Limited Weight of unwinding: 3T
- Total Power: 50kw

PAPER MACHINERY

Industrial PE Laminating, Sheet Lamination Machine Manufacturer

Product Description

- PLC controls tugging action of the whole laminating machine. Besides, the computer algorithm controls extrusion capacity of T-DIE automatically and changes tugging action with line speed.
- Input uses double shafts of the industrial lamination machine. It can detect the rest of paper automatically and warn in advance. When the paper roll is going to finish, the system will cut and receive the other paper roll automatically.
- The advantages of laminating machines are high efficiency, high quantity of output, low failure rate and high quality humanity operation interface.

Main Equipments of PE Lamination Machine:

1. Mill Roll Stand
2. Auto Splicer
3. Corona Treater
4. Extruder
5. T-DIE
6. Cooling System
7. Gravimetric Blenders

Product Specifications

Industrial Laminating Machine

- Laminating Method: Double Sides
- Extrusion Resin: LDPE
- Extrusion Capacity: Customers' requires are available
- Line Speed: 20~300M/min
- Laminating Application: Paper box of lunch, Pasteboard, Paper Cup , Carton, Plastic Package
- Laminating Width: Customization

BOBSEN

博森紙業股份有限公司

PAPER CO., LTD.

Paper

Bobsen is also one of leading PE coated paper manufacturers and poly coated paper suppliers in Taiwan. Demands of customers are always seriously taken by Bobsen because we always follow the principle of quality-first, customer first and customer-oriented.

Being an trustworthy, Bobsen offers a complete factory equipment export and technical consulting of laminated paper products manufacturing like PE laminated boards, PE laminated papers and die-cutting paper. Our laminated paper products can be widely used in paper cup, ice-cream cup, soup cup, plate, bowl, slice pizza packing, burger box and all kinds of uses for food & drinking paper packaging.

Laminated paper products are waterproof, greaseproof and moist proof, eco-friendly and high stiffness excellent printing effect.

Paper Forming Process

In addition to paper machinery, Bobsen supplies paper forming process which like paper cup forming, box forming, paper plate making process and paper plate manufacturing process...etc. Bobsen's quality of paper forming process is trustworthy and we always get good reputation from customers. Please do not hesitate to contact us for details if you have further questions.
